MAINTENANCE

The following steps should be performed on a regular basis to maintain your Lloyd table in a smooth operating condition and to assure its long life and top quality appearance.

- * An initial inspection and periodic future inspections should be made to insure that nuts and bolts have not loosened in shipping or during daily operations.
- * Your Lloyd table should be lubricated every **six months**. Parts to be lubricated are all pivot points, and metal to metal sliding mechanisms.
(DO NOT LUBRICATE FRICTION LOCKS)
- * The cushions should be cleaned daily with a mild soap & warm water solution to remove body oils. Rinsed & dried
- * Chrome parts should be cleaned on a weekly basis for appearance.
- * The hydraulic fluid recommended for the pump, is a lubriplate HO1 hydraulic oil, and
- * Perform periodic inspections for oil leaks or drips.
